ACRYLATE PENETRATING SEALER VARNISH

CONCRETE

NATURAL STONE

UNPOLISHED MARBLES

UNPOLISHED GRANITES

LIMESTONES

POROUS STONES

PACKAGING: 0,75L, 5L, 10L

CONSUMPTION: 12-18 m²/L

TECHNICAL SPECIFICATIONS

Form:	Liquid
Color:	Transparent
Odor:	Solvent
Density 20°C:	0.88 gr/cm ³
pH:	N/A
Flash point:	5°C
Freezing point:	0°C

Stored at temperatures from 3°C to 30°C.

Maximum V.O.C. content: / Μεγ. περιεχόμενο σε Π.Ο.Ε.: 650.8 g/L (20 °C) EU limit for the product: 750 g/L (2010)

DESCRIPTION

Transparent water based impregnating varnish for stones and artificial construction materials. Composition of high quality acrylate resin with very high weathering resistance. Contains UV filters for protection against UV radiation, non yellowing and non chipping. It is suitable for the protection and decoration of natural stone, granite, stone slabs, Malta tiles, porous stones, cement, Mosaics, bricks, etc. of indoor and outdoor surfaces. Protects against moisture and penetration of pollutants. While also from cracks caused by frost.

APPLICATION

Before the application, try the product on a small surface to see if you have the desired results and determine the ease of application. On a well-cleaned and dry surface apply the liquid without thinning, with a brush, air pistol or roller. After about 2 hours you can apply a second coat depending on the desired effect. Avoid usage at temperatures below 10°C and under very intense sunshine. After the application, the tools can be cleaned with white spirit.
