

AP-207 POLISHING WAX PASTE

POLISHING WAX PASTE FOR STONE

UNPOLISHED MARBLES

UNPOLISHED GRANITES

CERAMICS & TILES

POROUS STONES

LIMESTONES

PACKAGING: 0,25L, 0,75L

COVERAGE

7 m²/L - 12 m²/L Depending on the absorbency of the surface. This estimation refers to a single coat of the product.

PHYSICAL CHARACTERISTICS

Form:	Paste
Color:	White
Odor:	Solvent
Density at 20 °C:	1.3 gr/cm ³
pH:	N/A
Flashpoint:	100 °C
Freezing point:	0 °C

Stored at temperatures from 3 °C to 30 °C.

DESCRIPTION

Solid wax paste for the polishing of any type of stone. It can be used for the polishing of vertical surfaces where the usage of liquid polishers is difficult. It is suitable for the polishing of the corners and edges of marbles, granites, travertine, tiles and Mosaics, and other surfaces where the usage of polishing machines is difficult. It enhances the color of the stone. Thanks to the ease of its application it can be used on vertical and uneven surfaces, as also on many different stone constructions. The product can be applied on any type of stone that has been polished over the grit number 400 to achieve the best possible results. The surface becomes hydrophobic and gains a resistant non yellowing polish.

APPLICATION

Read the label carefully. Before each use, apply the product on a small area to determine the ease of application and if you have the desired results. Make sure that the surface is clean and free of waxes or other coatings.

Assure that the application space is adequately ventilated. In a cleaned and dry surface apply the paste evenly with a cloth. (Surfaces must be clean and free of dust). Leave the surface to dry for 5 to 10 minutes, depending on the temperature. If the stone is very porous or not sufficiently polished a second coat can be applied 20 minutes after the first coat. To achieve a very high level of polish buff the surface with a fine steel wool (No. 1) and if you prefer afterwards a soft cloth. It is also possible to polish the stone using a polishing machine (MAX. 2000 p. a. ee) equipped with a buffing disc.

INFORMATION ON STORAGE AND HANDLING

Flammable. Harmful: It can cause lung damage if swallowed. Prolonged exposure may cause skin dryness or cracking. Vapors may cause drowsiness and dizziness.

SAFETY INSTRUCTIONS

Keep out of the reach of children.
Away from sources of ignition - No smoking.
Take precautionary measures against electrostatic discharges.
If swallowed, do not induce vomiting: Seek medical advice immediately and show this container or label.
