TECHNICAL SPECIFICATIONS

Form: Liquid
Color: Transparent
Odor: Mild
Density 20°C: 1 gr/cm³
pH: 7
Flash point: 5°C
Freezing point: 3°C

Stored at temperatures from 3°C to 30°C.

DESCRIPTION

Cleaner of impregnated stains from polished marbles and stone surfaces. It is non acidic and it doesn't damage the polishing of marbles. It breaks down the stains that have penetrated in depth, such as ink, coffee, oil, wine and other stains caused from dyes. It can also be used for the bleaching of marbles. Restores the original color of old yellowed marbles.

APPLICATION

Always wear plastic gloves during application. Place a cotton or a cloth over the stain and soak it with the product. You can cover the cotton with a plastic film or bag to reduce evaporation. Leave it for a few hours until the stain is completely removed.

In many cases, it may take up to 24 hours to completely dissolve the stains. If after a few hours the AP-301 has evaporated, you can still add a little. In cases of very difficult stains, you can repeat process.

It can also be used to whiten the marbles. Apply the AP-301 to the surface without covering it and allow it to dry. Then rinse the surface with water.

INFORMATION ON STORAGE AND HANDLING

Harmful. Do not inhale vapours and fumes. Irritates the eyes and skin. May cause sensitization by skin contact. Vapours may cause drowsiness and dizziness.

SAFETY INSTRUCTIONS

Keep out of reach of children. Avoid contact with eyes.

Wear suitable protective clothing, gloves and eye/face protection.

In case of swallowing seek for medical advice immediately and show this container or label.
